

Tarang Rastogi

Frontend Developer and Aspiring Python Developer

tarangrastogi9@gmail.com | +91-9389293196 | linkedin.com/in/tarangrastogi | github.com/tarang-rastogi

PROFESSIONAL SUMMARY

BCA final-year student specializing in Cloud Computing and Cyber Security with hands-on experience in frontend and Python development. Passionate about applying learned concepts to real-world projects, including API-based applications and responsive web interfaces. Actively building skills in React, Python, and cloud technologies, and seeking an entry-level role to contribute, learn, and grow in a high-impact environment.

TECHNICAL SKILLS

Languages: Python (Proficient), JavaScript (ES6+), HTML5, CSS3.

Frontend & Design: React, Flexbox, CSS Grid, Responsive Design.

Cloud & Dev Tools: AWS (EC2/S3), Microsoft Azure, Linux Administration, Git, GitHub, VS Code.

Core Concepts: Data Structures & Algorithms, API Integration, Problem Solving, Debugging.

INTERNSHIP

Python Developer Intern | Oasis Infobyte (OIBSIP)

March 2026 – April 2026

- Engineered a **GUI-based BMI Calculator** and Password Generator using **Python (Tkinter)**, focusing on modular code architecture and robust data validation.
- Developed a real-time **Weather Application** by integrating **REST APIs** to fetch and parse JSON data for dynamic user display.
- Applied **OOP principles** to ensure code scalability and maintainability across multiple project modules.
- Managed version control and documentation using **Git/GitHub** within a remote, self-paced environment.

TECHNICAL PROJECTS

Personal Portfolio Website (In Progress) | *GitHub Link*

- Developing a responsive portfolio using **HTML, CSS, JavaScript, and React**.
- Built key sections (Home, About, Skills, Projects, Contact) with clean UI and structured layout.
- Implemented a contact form and currently working on deployment and improving user experience.

Weather API Integration App | *GitHub Link*

- Developed a Python application using the **Requests library** to provide live weather updates for global cities via OpenWeatherMap API.
- Handled error logging and edge cases for API request failures to ensure application stability.

EDUCATION

Bachelor of Computer Applications (BCA) — Cloud Computing & Cyber Security

IIMT University, Meerut

2023 – 2026

Current CGPA: **8.9/10**

CERTIFICATIONS

- Introduction to Generative AI Studio** — Simplelearn (Google Cloud)
- Agent AI Starter Course** — Saumya Singh
- Cloud Computing** — IIT Kanpur (E & ICT Academy)
- Linux Administration with Scripting** — IIT Kanpur (E & ICT Academy)
- Microsoft Azure Fundamentals** — IIT Kanpur (E & ICT Academy)
